

# Syrian Community Platform (SY-NL)

A comprehensive web & mobile platform for the Syrian community in the Netherlands

## 1. Overview

A full-stack web platform and mobile app for the Syrian community in the Netherlands, built with Next.js 15 and Expo React Native. The platform serves as a news hub, community management tool, and communication bridge for Syrians living in the Netherlands.

## 2. Technology Stack

| Technology             | Version | Purpose                     |
|------------------------|---------|-----------------------------|
| Next.js                | 16.2.6  | Full-stack React framework  |
| TypeScript             | 5.x     | Type safety                 |
| Tailwind CSS           | 4.x     | Utility-first styling       |
| Prisma                 | 6.11.1  | ORM (SQLite / Turso)        |
| NextAuth               | 4.24.x  | Authentication              |
| OpenAI SDK             | 4.100.x | GPT-4o / GPT-5.5 API        |
| Expo                   | 52.x    | Mobile (React Native)       |
| Zustand                | 5.x     | Client state management     |
| Zod                    | 4.x     | Validation                  |
| next-intl              | 4.x     | Internationalization (i18n) |
| Cheerio / html-to-text | latest  | Web scraping (sync)         |

## 3. Web Application Routes

- / — Homepage (News Agency layout)
- /about — About us
- /contact — Contact form
- /volunteer — Volunteer registration
- /news — News feed with categories & search
- /news/[slug] — Individual article view
- /news/category/[slug] — Category filtered list
- /login — Login page
- /signup — Create account
- /forgot-password — Password reset
- /events — Events calendar
- /gallery — Photo gallery
- /tasks — Community tasks

### **Dashboard (/dashboard/\*):**

- /dashboard/ — Stats & overview
- /dashboard/tasks — Task management
- /dashboard/ai — AI assistant (GPT-5.5)
- /dashboard/messages — Messages
- /dashboard/users — User management
- /dashboard/comments — Comment moderation

- /dashboard/pages — Page management
- /dashboard/events — Event management
- /dashboard/subscribers — Newsletter subscribers
- /dashboard/volunteers — Volunteer management

## **4. API Endpoints**

- /api/auth/\* - Authentication (NextAuth, signup, password reset)
- /api/news - CRUD news articles
- /api/comments - Comments with moderation
- /api/events - Event management
- /api/contact - Contact form submissions
- /api/sync - Automated news sync from sy-nl.org
- /api/upload - File uploads
- /api/ai/\* - AI features (chat, suggest, translate)
- /api/members\* - Member management & email broadcast
- /api/surveys - Survey system
- /api/dashboard/stats - Admin statistics
- /api/subscribe - Newsletter subscription

## **5. Automated Sync System**

The platform includes an automated sync engine that scrapes news from sy-nl.org (Hostinger Website Builder, no RSS/API). It uses section-based HTML extraction with regex, downloads images locally, detects YouTube video IDs from thumbnail URLs, and categorizes content via keyword mapping or OpenAI. The sync system is deployed as a PM2 process with hourly cron jobs.

## **6. Mobile Application**

An Expo React Native app with:

- News articles and categories
- Messaging / chat system
- Profile management
- Favorites/bookmarks
- Independent i18n (Arabic, English, Dutch)
- AI chat integration

## **7. Artificial Intelligence**

- OpenAI GPT-5.5 for chat, translation, and summarization
- RAG (Retrieval Augmented Generation) for fact-based answers
- Sentiment analysis
- Smart news categorization via OpenAI fallback
- Dashboard AI assistant

## **8. Database**

- Development: SQLite (prisma/dev.db)
- Production: Turso (libSQL)
- Prisma ORM with full migration pipeline
- 10+ models: User, Post, Comment, Event, Task, Contact, Subscriber, Volunteer, Notification, etc.

## **9. Internationalization (i18n)**

3 languages supported: Arabic, English, Dutch

- Web: next-intl with src/messages/{ar,en,nl}.json (600+ keys)
- Mobile: Custom i18n context with {ar,en,nl}.json (60+ keys)
- Full RTL support for Arabic

## **10. Deployment Targets**

- Staging: Vercel (sgn-indol.vercel.app)
- Production: Hostinger VPS (sy-nl.org)
- Mobile: Expo APK / IPA
- Process manager: PM2 with ecosystem.config.js

## **11. Completed Features**

- ' Full authentication system (email/password, NextAuth)
- ' Comprehensive admin dashboard
- ' News system with categories, search, and pagination
- ' Comment system with moderation
- ' AI assistant (GPT-5.5) with RAG
- ' Mobile application (Expo React Native)
- ' Advanced SEO (sitemap.xml, robots.txt, JSON-LD structured data)
- ' Full RTL support for Arabic
- ' Automated news sync engine with image/video extraction
- ' Member management with CSV import/export
- ' Email broadcast system
- ' Survey/poll system
- ' Volunteer registration
- ' Event calendar
- ' Photo gallery
- ' Push notifications
- ' i18n in 3 languages

## **12. Completed Milestones**

M1: Project Setup ' | M2: Informational Site ' | M3: Auth + Dashboard '

M4: AI Integration ' | M5: Mobile App ' | M6: Deployment '

## M7: Automated Sync Engine ' | M8: Sync Images & Video '

Project ready for production deployment. Full deployment guide available in `HOSTINGER_DEPLOY.md`.
